

Susan Kellogg

CIO and Associate Dean of Information Technology

UNC

KENAN-FLAGLER BUSINESS SCHOOL

Susan Kellogg is Chief Information Officer and Associate Dean of Information Technology at The University of North Carolina's Kenan-Flagler Business School in Chapel Hill, N.C. She works collaboratively with university leaders to determine the technology strategies that support research and teaching. Susan is responsible for all aspects of technology at the business school, including educational media, student systems, collaboration, information management, networks, staff/student desktop support and industry-standard levels of service.

Susan is a technology strategist with more than twenty years of experience across all areas of technology. Prior to joining the business school in 2003, she worked for Progress Energy as a manager and technology architect creating the corporate technology strategy with the company's chief technologist and managing many major infrastructure components of this Fortune-500 company.

Susan's previous experience included several roles of increasing responsibility with GlaxoSmithKline (formerly GlaxoWellcome) where she also co-chaired an international committee on corporate Internet standards. Early in her career, she worked in military technology, gaining broad experience in technology standards and security.

Kellogg earned a BS in Computer Science from UNC-Chapel Hill and a MS in Computer Science from the University of Colorado.
