Clinton, Trump Neck-and-Neck in NC; Burr and Ross Just as Close in Senate Match-up; Can Cooper and HB2 Flip Governor's Seat to Blue? In an election for President of the United States held in North Carolina today, 10/04/16, 16 days until early voting begins, Hillary Clinton edges Donald Trump 46% to 44%, according to this latest exclusive WRAL-TV News Poll conducted by SurveyUSA. 5% of likely voters today vote for Libertarian Gary Johnson; 6% are undecided. Clinton leads by 12 points among women; Trump leads by 9 among men -- a 21 point gender gap. Trump leads by 20 among white voters; Clinton leads by 75 among African Americans. Clinton holds 91% of the Democratic base; Trump holds 87% of Republicans. Independents narrowly break for Trump. Trump leads in Charlotte and to the west, as well as in greater Greensboro; Clinton leads in greater Raleigh. The candidates tie in the southern and coastal portions of the state. Suburban men narrowly back Trump; suburban woman strongly support Clinton. Voters focused on health care support Clinton 2:1; voters most focused on the economy back Clinton by an 8-point margin. Those most focused on immigration support Trump 4:1; those focused on national security support Trump 5:3. In the race for United States Senate, incumbent Republican Richard Burr narrowly leads Democrat Deborah Ross, 46% to 44%. Libertarian Sean Haugh takes 3%; 7% are undecided. Burr, who is seeking his third term, leads by 12 points among men and by 20 points among white voters. Ross, a former General Assembly member from Raleigh, leads by 7 points among women and by 57 among African Americans. Ross leads 2:1 among those who almost never attend religious services; Burr leads 5:3 among those who attend regularly. Democratic Attorney General Roy Cooper leads incumbent Republican Pat McCrory by 4 points in the race for Governor, 48% to 44%. Independents, who break for the Republicans in the Presidential and US Senate races, here narrowly favor the Democrat, who also leads nearly 2:1 among moderates. Suburban men are divided; suburban women back Cooper by 21 points. McCrory, seeking his second term, previously was mayor of Charlotte for 14 years. Charlotte and western Carolina voters narrowly favor McCrory by a 5-point margin; those in the Greensboro area support McCrory by 6 points. Cooper leads by 24 points in the Raleigh area; voters elsewhere split. Cooper has strong support among voters focused on HB2, on education, and on health care. McCrory has strong support among voters focused on the economy, public safety, and taxes. 52% of registered voters today say they disapprove of House Bill 2, the state law passed in March. 35% say they approve of HB2. 64% say the law has hurt North Carolina's national image. 65% say it has hurt the state's ability to attract and keep businesses. In the wake of NBA, NCAA, and ACC basketball events being pulled from North Carolina, 47% say the state legislature and governor bears the responsibility for the associated financial losses to the state. 31% put the blame on the leagues themselves. Another 12% say the Charlotte City Council bears the most responsibility. 44% say HB2 should be entirely repealed; 19% say the law should be repealed but its restrictions on restroom use should be left in place. 14% say some other combination of changes should be made; 15% say the law should be left as it is. 51% of likely voters say a candidate's position on HB2 will strongly influence how they vote this November; 28% say it will somewhat influence their vote. 15% say it will have no impact. Context and Filtering: SurveyUSA interviewed 800 state of North Carolina adults 09/29/16 through 10/03/16. Of the adults, 728 were registered to vote. Of the registered, 656 were determined by SurveyUSA to be likely to vote on or before 11/08/16 in the Presidential election. This research was conducted using blended sample, mixed mode. Respondents reachable on a home telephone (72% of likely voters) were interviewed on their home telephones in the recorded voice of a professional announcer. Respondents not reachable on a home telephone (28% of likely voters) were shown a questionnaire on the display of their smartphone, tablet or other electronic device. Republican Mitt Romney defeated Democrat Barack Obama by 2 points in 2012; Obama defeated Republican John McCain by less than 1 point in 2008. North Carolina has 15 electoral votes.

1 If the election for President of the United States were today, and you were filling out your ballot right now, who would you vote for? (names rotated) Republican Donald Trump? Democrat Hillary Clinton? Or Libertarian Gary Johnson?

20 North Carolina has a new law governing video from police body cameras. Except for someone in the video or that person's family, the law requires most people including journalists to obtain a court order in order to get a copy. What do you think about this law? It's too strict? It's too loose? Or it's about right?

20 North Carolina has a new law governing video from police body cameras. Except for someone in the video or that person's family, the law requires most people including journalists to obtain a court order in order to get a copy. What do you think about this law? It's too strict? It's too loose? Or it's about right?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone, in some cases, 100% online, and in other cases a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers and answering machines. For surveys using random-digit-dial (RDD) to call landline phones, sample is purchased from SSI of Shelton CT. For surveys using voter-list (RBS) sample to call landline phones, sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from SSI, from Aristotle, or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. If sample of adults is drawn from SSI, responses are minimally weighted to U.S. Census targets for gender, age and race. If sample of voters is drawn from Aristotle, responses are minimally weighted to the known demographics of the voter file, which include gender and age but, typically, not race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. SurveyUSA assigns to each question within the instrument a theoretical margin of sampling error, but such error is useful only in theory. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
