

Alternate A proposes leaving current facilities and operations as they are now. Current vehicular access to the Sycamore parking area is via the park entrance on US 70, and then along approximately 2.2 miles of park road (1.2 miles of paved road followed by 1 mile of gravel road). Access into and out of the parking area is by one-way loop gravel road as shown on the map. The park trails system will continue to be accessible from the end of Graylyn Drive.
