2 Wks Till NC Super Tuesday Primary Votes Are Counted in Democratic Nominee Bid for President, Bloomberg, 78; Sanders, 78; and Biden, 77 Run Effectively Even in Fight to Face Trump, 72, in November; Other Statewide Contests Less White-Knuckle; Forest, Cunningham Advance:

With early voting in NC underway, 2 weeks till ballots are counted, there is little drama in the Republican and Democratic primaries for NC Governor, less drama in the Republican and Democratic primaries for US Senator, and no drama in the NC Republican primary for President of the United States, according to SurveyUSA's latest pre-election poll conducted exclusively for WRAL-TV in Raleigh.

All of the suspense and spotlight in North Carolina will fall on the Democratic primary for President, where 3 old, white men today run effectively even, with twice the support of the next tier of Democrats. At this hour, the contest stands:

- * Mike Bloomberg, 22%.
 - * Bernie Sanders, 22%.
 - * Joe Biden, 20%, effectively even with Bloomberg and Sanders; should not be characterized as trailing or in 3rd place.
 - * Pete Buttigieg, 11%.
 - * Elizabeth Warren, 8%.
 - * Amy Klobuchar, 5%.
- * Bloomberg's support is old, female, moderate and concentrated in Southern and Coastal NC.
 - * Sanders' support is young, male, "very liberal" and concentrated among voters who say they are "just getting by."
 - * Biden's support is black, high-school educated, self-described "poor" and "falling behind."

In the Republican primary for **Governor**, Dan Forest today leads Holly Grange 7:1. Forest will advance to the 11/03/20 general election and face incumbent Democrat Roy Cooper, who today leads Earnest Reeves, 8:1.

In the Democratic primary for **US Senator**, Cal Cunningham leads Erica Smith 42% to 17% at this hour. If Cunningham wins, he will advance to the 11/03/20 general election and face incumbent Republican Thom Tillis, who today leads token opposition 15:1.

President Donald Trump's job approval in NC is **Minus 7**. 45% of voters approve of the job Trump is doing as President, including 24% who strongly approve. 52% disapprove, including 41% who strongly disapprove.

Governor Cooper's job approval is **Plus 15**. 50% of voters approve of the job Cooper is doing, 35% disapprove.

Senator Tillis' job approve is **Minus 4**. 38% of voters approve of the job Tillis doing, 42% disapprove.

5 times as many NC voters strongly disapprove of the job the United States Congress is doing as strongly approve.

About: SurveyUSA interviewed 2,760 adults from the state of North Carolina 02/13/20 through 02/16/20. All interviews were completed after the results of the New Hampshire primary were known but before caucusing in Nevada had begun. Of the NC adults, 2,335 are registered to vote. Of the registered, SurveyUSA identified 698 voters as likely to return a Democratic primary ballot before the 03/03/20 deadline and 501 voters likely to return a Republican primary ballot before the 03/03/20 deadline. Note well: The outcome of the 02/22/20 Nevada caucus and the 02/29/20 South Carolina primary will affect primary voting in North Carolina and the 13 other states which report Super Tuesday results 03/03/20. Bloomberg, who is running a disruptive campaign (in the business-school use of disruptive, which is neutral, not critical), may by 03/03/20 be even more of a darling, with a ceiling higher than the 22% he polls at today, or Bloomberg may find that

** Too few respondents of this type were interviewed for this data to be meaningful.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
