Release Date: 02/19/2020

Percentages

Compared to 4 Years Ago: Twice as Many in NC Doing Better Financially Now Than Doing Worse

In Head-to-Head Match-Ups Today, NC's 15 Prized Electoral Votes Flip Blue If Democrats Bloomberg, Sanders, or Biden Oppose Trump; NC Stays Red if Klobuchar or Warren Are Nominated; Buttigieg vs Trump Is A Coin-Toss At This Hour, 37 Weeks Till Votes Are Counted:

2 weeks till North Carolina counts its primary ballots, 26 weeks till Charlotte hosts the Republican National Convention, and 37 weeks until Election Day, the Tar Heel State's 15 critical electoral votes are very much up-for-grabs, as voters take stock of the current crop of Democrats and imagine who they would pick in head-to-head match-ups.

In research conducted by SurveyUSA exclusively for WRAL-TV in Raleigh, the NC pendulum swings this way:

- * Mike Bloomberg carries NC by 6 points today , defeating President Trump 49% to 43%.
- * Bernie Sanders carries NC by 5 points today , defeating Trump 50% to 45% .
- * Joe Biden carries NC by 4 points today , defeating Trump 49% to 45% .
- * Pete Buttigieg and Trump run even today .
- * Trump holds onto NC by 4 points today in a face-off against Elizabeth Warren, 48% to 44% .
- * Trump hold onto NC by 4 points today , in a face-off against Amy Klobuchar, 46% to 42% .

How does the impeachment and acquittal of Donald Trump color the way Tar Heel voters see the 2020 ballot?

- * 28% of voters statewide say they are committed to vote for Democrats up and down the 2020 ballot.
- * 13% of voters statewide say they are more likely to vote for a Democrat.
- * 21% say they are their vote will not be affected by impeachment one way or the other.
- * 14% of voters statewide say they are more likely to vote for a Republican.
- * 22% of voters statewide say they are committed to vote for Republicans up and down the 2020 ballot.
- * Aggregated: 41% lean left, 36% lean right, with the left angrier than the right.

43% of adults statewide say are doing better financially today than they were 4 years ago. Half as many, 23%, say they are doing worse financially, a reflection of the strong economy under President Trump.

About: SurveyUSA interviewed 2,760 adults from the state of North Carolina 02/13/20 through 02/16/20. All interviews were completed after the results of the New Hampshire primary were known but before Mike Bloomberg took the debate stage in Las Vegas and before caucusing in Nevada had begun. Of the NC adults, 2,366 are registered to vote.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principals of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
